

Architecture of Intelligent Innovations

Business Model & Business Plan

The Operating System for Predictable Innovation

Business Model

Core Thesis: We don't sell AI projects. We sell the architecture that makes AI projects succeed 3x faster, 70% cheaper, with 85% reusability.

Revenue Streams

Stream	Description	Customer	Pricing	Year 1 Target
Blueprint Sprints	6-week engagements to architect in Mid-market to Enterprise			\$300k
Intelligence OS	SaaS: reusable AI agents, pipelines Platform		\$499-\$2,499/mo	\$480k ARR
All Studio	Co-build ventures for equity + cash	Domain expert founders fellow		
Training & Certs	Upskill teams to Innovation Architects	L&D, eng leaders	\$2.5k/person	\$150k

Total Year 1 Revenue Target: \$1.03M at 72% Gross Margin

Moat: Every Blueprint Sprint adds components to Intelligence OS. Client 1 pays us to build a document-parser. Client 10 gets it for 10% of the cost, and we keep 90% margin. The moat compounds.

Business Plan

1. Problem

87% of AI pilots never reach production. Traditional R&D; takes 9 months, has a 25% success rate, and starts from zero every time. Companies waste \$4.5T annually on innovation theater.

2. Solution

All is the operating system for predictable innovation. We provide:

- **Blueprints:** Documented systems for how to build, not just what to build
- **Components:** Pre-built AI agents, data pipelines, UI modules with 85% reusability
- **OS:** SaaS platform that runs innovation sprints like software sprints

Result vs Traditional: 3x faster to MVP, 70% cost reduction, 2.8x higher success rate.

3. Market & Wedge

TAM: \$647B global R&D; spend. **SAM:** \$89B spent on failed digital/AI initiatives. **SOM Year 3:** \$85M.

Beachhead: Start with 1 vertical where process pain = \$\$\$\$. Options: Legal ops, healthcare admin, logistics, construction. Land 3 case studies, then expand.

4. Go-To-Market Strategy

Phase	Timeline	Goal	Key Metric
Land	Months 1-6	3 paid Blueprint Sprints in 1 vertical	\$150k revenue, 3 case studies
Expand	Months 7-18	Launch Intelligence OS, 1 Studio venture	\$1M ARR, 15 components
Platform	Year 2-3	Become standard: marketplace for All c revenue,	

5. Competition & Advantage

Competitor	They Do	We Do Different
AI Agencies	Build custom projects, then leave	Build reusable architecture, then license it
Big Consulting	Sell 1000-page decks and headcount	Sell working systems + components
MLOps Tools	Sell infra to engineers	Sell outcomes to business leaders

Our Moat: Network effects in the Component Library. Each client makes the platform 10% better for the next.

6. Financial Projections

Metric	Year 1	Year 2	Year 3
Revenue	\$1.03M	\$3.2M	\$8.5M
Gross Margin	72%	78%	85%
Burn Rate	\$65k/mo	\$120k/mo	\$180k/mo
Headcount	4	9	18
Reusable Components	15	60	200+

7. Team & The Ask

Team: [Tomas Nelson, Founder & Chief Architect — [Npower Technical Institute for Vets]. Seeking: Founding Engineer, Head of GTM

The Ask: \$500k pre-seed for 18 months runway.

- **60% Engineering** — Build Intelligence OS v1, hire 2 founding engineers
- **25% GTM** — Land 3 design partners, produce benchmark case studies
- **15% Ops** — Legal, IP, initial component library

18-month milestones: \$1M ARR, 15 shipped components, 1 All Studio venture launched **Vision:**

Every company will need an Innovation Architecture. We're building the standard.
