Document 1: Invention Disclosure Record

Purpose: Establish dated proof you conceived this invention first. Use before any public disclosure.

1. Title of Invention

[ARCHITECTURE OF INTELLIGENT INNOVATIONS - The Operating System for Predictable Innovation]

2. Inventor(s)

Name: [TOMAS NELSON]

Address: [Carrollton, TX 75006]

Email: [tomasm.nelson@gmail.com]

Date of Conception: [May 30, 2026]

3. Description of Problem Solved

[87% of AI pilots never reach production. Traditional R&D; takes 9 months, has 25% success rate, zero reusability. Companies waste \$4.5T annually starting from scratch every project. No systematic architecture exists for shipping intelligent products.]

4. Description of Invention

[All is a 4-layer architecture and SaaS operating system that replaces ad-hoc R&D; with blueprints, reusable components, and systems engineering. Layers: Foundation (data/compute/talent), Core (AI agents/pipelines), Application (assembled products), Output (shipped innovations). Key innovation: Component Library with 85% reusability where each client engagement makes the platform 10% better for next client. Business model: Blueprint Sprints + Intelligence OS SaaS + All Studio + Training. Result: 3x faster to MVP, 70% cost reduction, 2.8x higher success rate vs traditional R&D.;]

5. Novel Features / What Makes This Different

a. [Compound reusability: Traditional consulting has 0% reuse. All components are reused across clients]

b. [Architecture-first vs project-first: We sell the system for building, not custom builds]

c. [Network effects in B2B services: Client 1 funds component that Client 10 uses at 90% margin]

d. [Innovation OS category: Not MLOps tool, not agency, new category like 'AWS for innovation']

6. Prior Art Search

Known similar solutions: [AWS SageMaker, Palantir Foundry, Accenture AI, Traditional dev shops]

How All differs: [Unlike MLOps tools we sell business outcomes not infra. Unlike consulting we retain and license IP. Unlike agencies we productize the methodology.]

7. Commercial Applications

[1. Enterprise AI transformation, 2. Mid-market product teams needing AI but lacking ML staff, 3. Venture studios co-building AI startups, 4. Training/certification for Innovation Architects]

8. Date of First Public Disclosure

[NONE YET / If disclosed: Date + to whom + under NDA?]

Inventor Signature: _____ Date: _____

Witness Signature: _____ Date: _____

Witness _____ Name/Address: _____
